AGENDA

SPECIAL MEETING COMMITTEE ON ADMINISTRATION/INFORMATION SYSTEMS

May 17, 2004 Aldermen Forest, Gatsas, Osborne, Porter, Lopez 4:00 PM Aldermanic Chambers City Hall (3rd Floor)

- 1. Chairman Forest calls the meeting to order.
- 2. The Clerk calls the roll.

TABLED ITEM

A motion is in order to remove the following item from the table for discussion.

3. Discussion relative to the 2005 revaluation. (Tabled 05/05/2004 pending receipt of further information from Assessors.)

OTHER BUSINESS

4. Discussion regarding Ordinances:

"Amending Chapter 130: General Offenses of the Code of Ordinances of the City of Manchester by repealing Section 130.10 Tattooing in its entirety."

(Tabled: 07/16/2002 and received and filed on 01/20/2004.)

"Amending the Zoning Ordinance of the City of Manchester to include a new use group category for Tattoo Parlors, inserting changes to Table 5.10, adding supplementary regulations for tattoo parlors, and providing for location restrictions so as to prohibit such parlors within 600 feet from each other and not less than 500 feet from a Residential or Civic Zone."

(Table: 07/16/2002 and received and filed on 01/20/2004.)

Gentlemen, what is your pleasure?

5. If there is no further business, a motion is in order to adjourn.

Board of Mayor and Aldermen

Assessment Review and Valuation Update

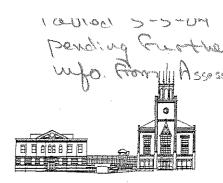

From: Board of Assessors Date: April 2, 2004

โร๊รโร้tant to Assessors

IN BOARD OF MAYOR & ALDER Ann Provencher April 6, 2004

ON MOTION OF ALD.

Porter

SECONDED BY ALD.

Lopez

refer to the Committee on Administration/Information Systems.

The following documents are enclosed for information and, more importantly, to assist in the deliberation at the BMA meeting on April 6th, regarding the requirement for a Valuation Update.

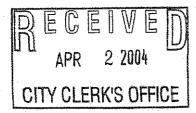

- 1. A brief hardcopy presentation outlining the issues leading to the need for a Valuation Update;
- 2. A copy of the latest accepted ratio analysis from the DRA, effective April 1st, 2003;
- 3. Analysis indicating the assessment level increases between residential and non-residential since 2001, the last date of a citywide revaluation;
- 4. A copy of a letter sent to DRA identifying issues requiring clarification.

We anticipate a great deal of discussion on these subjects. Therefore, should any member of the BMA wish to call or meet with the Board of Assessors in advance of the scheduled Board meeting for additional information regarding any particular issue, we would welcome that opportunity.

Also, in attendance at the next scheduled BMA meeting on April 6th, to assist in clarifying State and Department of Revenue Administration issues, will be Manager Guy Petell, Assessment Bureau, DRA.

In addition to the above mentioned enclosures, a spreadsheet denoting all changes to the City's exemptions and deductions since 1990 are detailed, pursuant to a request from Aldermen at the last BMA meeting on March 16th.

Valuation Update

Analysis of Benefits Board of Assessors April 6, 2004

Why reassess property?

- The Constitution requires a "valuation anew" at least every five years.
- A recent Supreme Court decision (Sirrell) clarified in 2001 what a valuation anew means.
- The process returns all property to market value.
- The Assessment Review process requires it.

What is Assessment Review?

- A process established by the legislature in response to Sirrell Decision.
- Started as a set of assessing standards.
- Designed to make sure all cities/towns are consistently valuing property.
- Became a review process, with guidelines instead of standards.

When is our Assessment Review?

- The City's Assessment Review is for tax year 2004. The schedule was determined under statute by the Department of Revenue Administration.
- Each city/town was assigned to one of four years, beginning in 2003.
- The next year of Assessment Review will be tax year 2009.

What does Assessment Review require?

- Certain record-keeping and accuracy of data requirements.
- Attainment of market value (ratio between .90 and 1.10) in year of review.
- Having reasonable proportionality (low coefficient of dispersion).
- Having commercial, residential, and vacant land assessed within 5% of ratio.

Do we meet requirements?

- We will likely meet the record-keeping and data accuracy requirements.
- It is very unlikely that we will meet some of the statistical requirements. In tax year 2003, our ratio was 65.1% (just released by DRA). Our COD is still reasonable.
- All classes of property are not assessed at the same level.

Why did the ratio drop so much since the last revaluation?

- The ratio measures the relationship between assessed value and market value.
- If market values are increasing with no changes to assessments, the ratio declines.
- The market value of almost every class of property, as shown by their ratios, have increased.

When should we reassess?

- The last reassessment was in tax year 2001, with an effective date of April 1, 2001.
- To meet the Assessment Review guidelines, we would have had to reassess in 2004.
- To meet our constitutional obligations, the latest we can accomplish a reassessment is tax year 2006, with an effective date of April 1, 2006.

What are the different kinds of reassessments?

- The traditional reassessment is known as a *Full Revaluation*. In a full revaluation, all properties are inspected, measured, and valued.
- A more progressive approach is to conduct *Valuation Updates*. In these, all properties are valued, but not all properties are inspected and re-measured. Property inspections are made on a cyclical basis.

Assessors recommendations

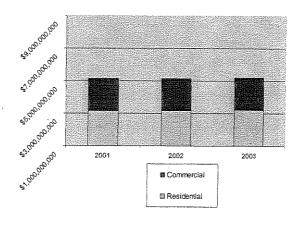

- The Assessors recommend that a valuation update be completed for tax year 2005.
- The Assessors are preparing, by increasing staff and acquiring more tools, to complete an in-house revaluation for tax year 2009.
- This schedule will be balanced, will evenly spread the work-load, and will comply with statutory and constitutional requirements.

Other relevant issues

- A question has been raised regarding any shift from commercial to residential values that might be produced by reassessing all property in the city.
- The Assessors have analyzed both the level of assessment, and equalized values for each of these classes of property.

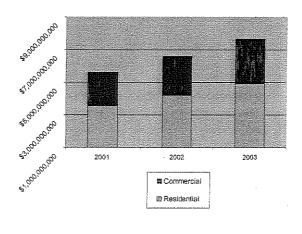

Residential and Commercial Assessed Values

- The previous slide shows that there has been almost no shift in the balance between residential (62.1%) and commercial (37.9%) assessed values.
- The following slide shows the balance between equalized values for these same classes of properties. Equalized values are described in the April 2, 2004 Residential and Commercial Values Memorandum.

Residential and Commercial Equalized Values

- The previous slide shows that, while there has been significant growth in values since 2001, that growth has occurred in both classes of property, and at similar rates.
- The result is shown below, with no apparent shift in the balance between residential and commercial property demonstrated.

| | 2001 | 2002 | 2003 |
|-----------------------------------|------------------|-----------------|------------------|
| Total Equalized Residential Value | \$ 3,569,925,886 | \$4,194,779,392 | \$ 4,921,551,081 |
| Total Equalized Commercial Value | \$ 2,032,872,905 | \$2,390,265,853 | \$ 2,730,528,563 |
| Total Equalized Value | \$ 5,602,798,791 | \$6,585,045,245 | \$7,652,079,644 |
| Percentage Value Commercial | 36% | 36% | 36% |
| Percentage Value Residential | 64% | 64% | 64% |

Estimated cost of re-valuations

• The Assessors predict that the costs associated with revaluation activities between now and 2019 can be estimated as follows:

| | st Cycle 01-2009 | Se 20 | cond Cycle 10-2019 |
|---------------------------------|---------------------|----------|-----------------------|
| Cost of Value Update (5th) | \$ 750,000 | \$ | 915,200 |
| Cost of Full Revaluation (10th) | \$ 2,080,000 | \$ | 2,288,000 |
| Years in Cycle | 8 | | 10 |
| Total Cost per year | \$ 353,750 | \$ | 320,320 |

Potential Savings

- By funding the additional appraiser positions, we will be able to conduct inhouse reassessments following the 2005 valuation update.
- There will likely be a need for some outside consultant expense, particularly in the first cycle.

Other Benefits

- By instituting a policy of regularly scheduled revaluation, and a practice of regular cyclical inspection of properties, the Assessors will be able to better serve the taxpayers, and meet our statutory and constitutional obligations.
- We will also be able to respond quickly to changes in values of classes of property.
 This will provide better equity to all taxpayers.

COMMUNITY SERVICES Robert M. Boley, AAS Director

> Barbara J. Robinson Assistant Director

TOWN OF MANCHESTER OFFICE OF SELECTMEN 1 CITY HALL PLZ W WING MANCHESTER, NH 03101

Dear Selectmen/Assessing Officials:

As you know, the Department of Revenue Administration is charged with the responsibility of annually equalizing the local assessed valuation of municipalities and unincorporated places throughout the state. The Department has conducted a sales-assessment ratio study using market sales that have taken place in your town between October 1, 2002 and September 30, 2003. Based on this information, we have determined the average level of assessment of land, buildings and manufactured housing as of April 1, 2003.

The sales values have been determined from revenue stamps and verified whenever possible. When it appears that changes in the assessed values of properties have been made solely because of the sale price, the assessed values prior to the sale have been used.

Based on the enclosed survey, we have determined the overall sales-assessment ratio for the land, buildings and manufactured housing in your town for Tax Year 2003 to be 65.1%. This ratio will be used to equalize the modified local assessed valuation for all land, buildings and manufactured housing in your municipality. This ratio does not include any public utility property in your town, nor will it be used to equalize the net local assessed valuation of public utilities.

In an effort to provide municipalities with more detailed information regarding their level of assessment (i.e., equalization ratio) and dispersion (i.e., coefficient of dispersion and price-related differential), we have prepared separate analysis sheets for various property types (stratum). See attached summary sheet showing your municipality's stratified figures and a further explanation of the D.R.A.'s stratified analysis.

Please review the enclosed list of sales used in determining your sales-assessment ratio. If any incorrect data has been used, or if you would like to meet with me to discuss this ratio or an alternate ratio methodology as outlined in the accompanying information sheet, please contact me immediately.

You will be notified of your municipality's total equalized valuation when the Department has completed its process of calculating the total equalized valuation.

Sincerely.

Linda C. Kennedy

Board of Assessors April 2, 2004

Re:

Residential and Commercial Values

The Assessors have conducted an analysis to understand whether there is a shift in the balance of residential and commercial values in the City. The following is a statement of the results of the analysis.

| | 2001 | 2002 | 2003 |
|-----------------------------------|------------------|------------------|------------------|
| Total Equalized Residential Value | \$ 3,569,925,886 | \$ 4,194,779,392 | \$ 4,921,551,081 |
| Total Equalized Commercial Value | \$ 2,032,872,905 | \$ 2,390,265,853 | \$ 2,730,528,563 |
| Total Equalized Value | \$ 5,602,798,791 | \$ 6,585,045,245 | \$ 7,652,079,644 |
| Percentage Value Commercial | 36% | 36% | 36% |
| Percentage Value Residential | 64% | . 64% | 64% |

The equalized value is the assessed value for individual categories of property, divided by the median ratio for each category. The result is an estimate of market value for each category (i.e.: improved residential, vacant commercial, residential condominium, etc...). These estimates are totaled to reveal a total market value for residential and commercial properties.

The percentage value for residential and commercial properties represents the percentage of total value.

The percentage of assessed value for commercial properties in 2001 was 39%, and the percentage of assessed value for residential properties was 61%. With only minor variations, that relationship has remained the same.

The analysis shows that there has been no significant shift in the balance of commercial and residential values in the City since 2001.

On the following page is a more detailed summary of the analysis completed.

Residential and Commercial Equalized Values

Assessed values for each category divided by the appropriate ratio to reveal a total market value estimate for that class of property.

Ratio used for each category or property type is the median. Source for ratios is the annual Department of Revenue Administration Equalization Survey.

Shaded entries for 2001 indicate insufficient data in that category to develop a ratio. In these cases, the most similar available ratio is used.

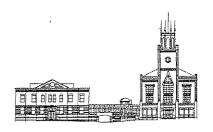

Shaded entries for 2003 indicate insufficient data in that category to develop a ratio. In these cases, projections trendining previous ratios, and analysis of other ratio indications has been made.

Re:

Manchester 2004 Assessment Review

Department of Revenue Administration Questions/Issues:

- How many Towns/Cities assigned 2003 "Assessment Review" date
- Of that total:
- 1) How many have passed their respective reviews?
- 2) How many have complied by formally adopting an acceptable plan?
- 3) How many have taken no action?
- If a 2003 Town/City has taken no action and has not passed their "Assessment Review", what action has, or will DRA take to remedy noncompliance?
- The following "What If" questions will likely be debated;
 - 1) What if City takes no action to comply with "Assessment Review" guidelines?
 - 2) What if BMA authorizes acceptable plan for 2005?
 - 3) What if BMA authorizes acceptable plan for 2006? (Last accepted Revaluation was in 2001)
- Be prepared to discuss relationship of the assigned 2004 "Assessment Review" date and the subsequent "Assessment Review" date of 2009

Board of Tax Land Appeals Question/Issue:

When Revaluations have been ordered, have they all been Full "Scratch Job" Revaluations compared to a less expensive remedy such as an update of existing data?

(The Board of Assessors has requested the information from staff at the BTLA and as soon as received willed be distributed to BMA.)

That the assessors provide the following to the board Mayor and Alderman before revaluation/update is approved for tax year 2005-

- a. An estimate of what the projected 2005 tax base may be after the revaluation/update is completed.
- b. What percentage of the tax base will be residential and what percentage will be non-residential.
- c. What shift will occur in the distribution of residential/non-residential property and what would be the magnitude of the shift.
- d. Provide an in-depth analysis by property category or geographical sector of the inequities existing to warrant a revaluation/update of all property in the city.
- e. Provide an estimate of what amount would be set aside for the overlay in 2004 in order to handle the subsequent abatements.

City of Manchester New Hampshire

In the year Two Thousand and TWO

AN ORDINANCE

"Amending Chapter 130: General Offenses of the Code of Ordinances of the City of Manchester by repealing Section 130.10 Tattooing in its entirety."

BE IT ORDAINED, By the Board of Mayor and Aldermen of the City of Manchester, as follows:

- Amend Chapter 130: General Offenses of the Code of Ordinances of the City of Manchester as enacted on October 2, 1962 by repealing Section 130.10 Tattooing in its entirety.
- II. This ordinance shall take effect upon passage.

City of Manchester New Hampshire

In the year Two Thousand and Two

AN ORDINANCE

"Amending the Zoning Ordinance of the City of Manchester to include a new use group category for Tattoo Parlors, inserting changes to Table 5.10, adding supplementary regulations for tattoo parlors, and providing for location restrictions so as to prohibit such parlors within 600 feet from each other and not less than 500 feet from a Residential or Civic Zone."

BE IT ORDAINED, By the Board of Mayor and Aldermen of the City of Manchester, as follows:

Amending the Zoning Ordinance of the City of Manchester by revising Sec. 5.10 and Article δ as follows:

- Section 5.10 Table of Principal Uses. Under use H-6 Services Personal, Business, and Repair add number 12 Tattoo Parlors, and insert a "P" in the column labeled "CBD" Central Business District, and insert a dash (-) in all other zoning district columns; also add reference number 8.06 in the Supplementary Regulations Column.
- Article 8 Supplementary Regulations for Specific Uses, Section 8.06 delete the title "[Reserved]" and replace it with the following:

8.06 Tattoo Parlors

- A. <u>Location Restrictions</u>. Tattoo parlors shall be subject to all regulations, requirements and restrictions for the zone in which the tattoo parlor is permitted and shall be subject to the following distance requirements:
 - No tattoo parlor shall be permitted within 600 feet of another tattoo parlor, and
 no other tattoo parlor shall be permitted within a building, premise, structure or
 any other facility that contains another tattoo parlor;
 - 2. No tattoo parlor shall be permitted within 500 feet of any Residential or Civic zoning district boundary line.
- B. <u>Measure of Distance</u>. The distancing requirements above shall be measured in a straight line, without regard to intervening structures, from the property line of any site above (unless otherwise specified) to the closest exterior wall of the tattoo parlor.
- Change Table of Contents, Article 8, Section 8.06 by deleting the title "[Reserved]" and replacing it with "Tattoo Parlors".

This ordinance shall take effect upon passage.
